

# COMPOSITE DECKING

Every Oeco decking project is constructed using high-grade, tanalised timber bearers supported by robust steel and concrete foundations—ensuring long-term strength, stability, and resistance to the elements.

We use only the finest materials all designed for superior performance, low maintenance, and timeless appeal. These boards resist warping, rotting, and colour fade, providing a lasting solution that looks exceptional year after year.

Our expert team combines craftsmanship with premium materials to deliver outstanding results that stand the test of time.

Every installation includes the chosen composite decking boards complete with a tanalised timber subframe, robust steel and concrete foundations, weed control membrane, decking trims and all necessary fixings and decking trims for a complete, long-lasting finish.

At Oeco, we specialise in the design and installation of premium-quality garden decking, combining craftsmanship, innovation, and attention to detail to transform outdoor space.

With nearly two decades of experience, our team has built a reputation for creating durable, beautifully finished decking that enhances both the look and usability of any garden.

Each installation is fully tailored to your needs - whether you're looking for a compact decking area for relaxing and dining or a large, multi-level outdoor entertainment space.

Our design team works closely with you to create a layout that complements your property and enhances your outdoor lifestyle.

Whether you choose Signature, VersaDeck, ProDeck and NorDeck composite, Oeco ensures every detail is handled with precision and care.

With two decades of expertise, we've built a reputation for excellence, reliability, and beautifully finished outdoor spaces tailored to each client.

Minimum order for installation is 10m2. 60 mile radius from HG4 1AJ postcode. For areas outside please call for pricing.

## Composite Decking Types

Our Signature composite decking boards offer a premium, durable alternative to traditional timber decking. Crafted from a high-strength wood-plastic composite made with recycled hardwood fibres and plastics, these boards are engineered for long-lasting performance. The result is decking that resists rot, warping, and splintering—while being both eco-friendly and low maintenance. A favourite among homeowners, Signature decking requires minimal upkeep and can be installed with either a realistic woodgrain-effect surface or a grooved, low-slip finish for added safety. Available in eight stylish colours: Coffee, Charcoal, Ivory, Light Grey, Olive Green, Redwood, and Teak.

VersaDeck is a premium decking solution engineered for exceptional performance, versatility, and efficiency. Each 3.6m board is crafted from a blend of recycled hardwood fibres and high-quality recycled plastics, encased in a durable capped polymer shell that provides superior resistance to wear, impact, and UV-induced fading. The result is an eco-friendly, low-maintenance decking option that outlasts traditional timber in both strength and appearance. What truly sets VersaDeck apart is its innovative dual-sided colour design—a unique feature not found in our Signature, ProDeck, or Nordeck ranges. Each board showcases two complementary colours, allowing you to mix and match tones or refresh your decking style with fewer materials. Available in three elegant colour pairings: Rosewood/Burnt Oak, Onyx/Pewter, and Platinum/Sandstone.

Our premium ProDeck boards are designed with an advanced capped composite shell that delivers superior protection against impact, UV fading, moisture, and standing water—making them perfect for high-traffic or demanding outdoor spaces.

Each ProDeck board features a reversible design with both a natural woodgrain texture and a sleek grooved surface, offering versatility in both appearance and function. Available in seven elegant, multi-tonal colours: Burnt Oak, Onyx, Pewter, Platinum, Quartz, Rosewood, and Sandstone.

Our luxury Nordeck decking represents one of the finest garden decking solutions available—perfect for modern, traditional, or contemporary outdoor designs. Backed by a 20-year warranty, Nordeck boards provide a premium, long-lasting alternative to traditional timber decking. Each board is finished with an ASA coating—a high-performance, weather-resistant material that delivers exceptional strength, durability, and colour stability, outperforming many other decking options on the market. Featuring a highly realistic timber-effect finish and low-slip surface, Nordeck decking combines the natural beauty of wood with the convenience of minimal maintenance. Engineered for both style and endurance, it sits proudly at the top of our decking range, offering lasting elegance and resilience. Available in seven sophisticated, multi-tonal colours: Ash Grey, Chestnut, Cedar Wood, Ebony, Black, Silver Birch, and Walnut.
