

Oeco GARDEN LODGES

Timber Frame Construction

All our garden lodge buildings are crafted with traditional timber-framed construction, using heavy-duty solid structural timber for the walls, floor, and apex A-frame roof. The floor timbers are pressure-treated with Tanelith E wood preservative for added durability. Fully insulated to Building Regulations, with a vapour barrier and double air-vented walls, these lodges are designed for year-round use.

Garden Lodges

The Classic Garden Lodge features a traditional apex roof design, offering timeless style and functionality.

It comes with either 2.4m sliding or 1.5m double patio doors, plus an opening window for ventilation.

Under permitted development, 4m-high garden lodges must be placed at least 2m from any boundary.

Professionally Plastered Interior

Each garden lodge comes with luxury plasterboarded and skimmed walls and ceilings, finished to the same high standards as a new home.

A professionally plastered interior provides a warm, elegant look, while also enhancing sound insulation and energy efficiency for year-round comfort.
